THE ROLE OF GAS IN EUROPE

AFG / Bilan et perspectives gazières – 12 March 2019

Andrea Galieti
Chair of the Eurogas Strategy Committee
The main challenges over the next decades, considering the Paris climate agreement’s target:

- Timely GHG reductions
- Security of Supply / Quality of Service
- Social acceptance
Creating the low-carbon world of the future requires a pragmatic approach

Tapping into the advantages of gas and its innovation potential is the best way to create a safe, secure, sustainable and efficient energy system, in favor of European citizens and industries.
...but the current gas market regulation is not fit for the future: 10 recommendations for a future gas package

*Create a predictable environment for r-gas and d-gas investments*

1. **EU binding targets** for r-gas and d-gas

2. Develop a EU blueprint for **Guarantees of Origin**

3. Further develop the EU **framework** for **support** schemes (accounting for all positive externalities, streamline)
...but the current gas market regulation is not fit for the future: 10 recommendations for a future gas package

**Develop value**

4. *unlock value* streams (missing markets for externalities) & *reduce regulatory burdens*

5. foster an increased *interaction* of the *gas* system with the *electricity* system

6. Obligation for *joint* gas/electricity *infrastructure planning* to take an integrated system view
...but the current gas market regulation is not fit for the future: 10 recommendations for a future gas package

**Scale up**

- Definition of the *roles and responsibilities* of regulated and market actors

- *Preserve* strategic role of the gas *infrastructures*, and support their *evolution* to accommodate increased volumes of renewables and decarbonized gas

- Enable the development of *carbon capture and storage* value chains
...but the current gas market regulation is not fit for the future: 10 recommendations for a future gas package

**Fix**

establish a European assessment and guidance on *life-cycle* greenhouse gas (GHG) emissions
Merci de votre attention!
